

Cobblestone Landscape

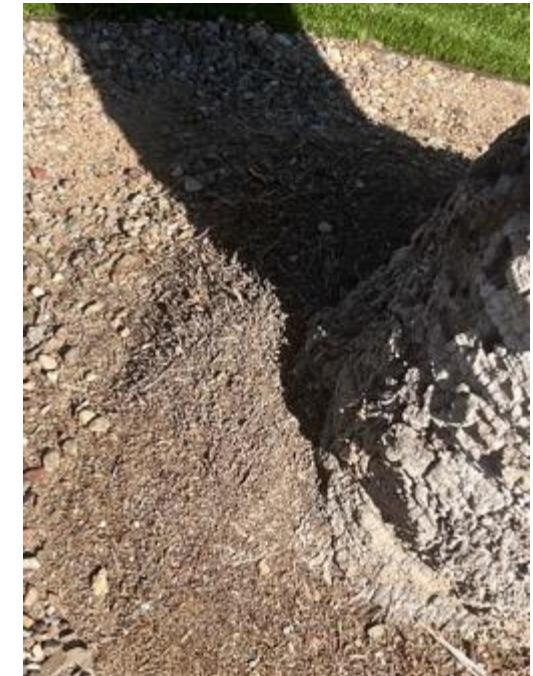

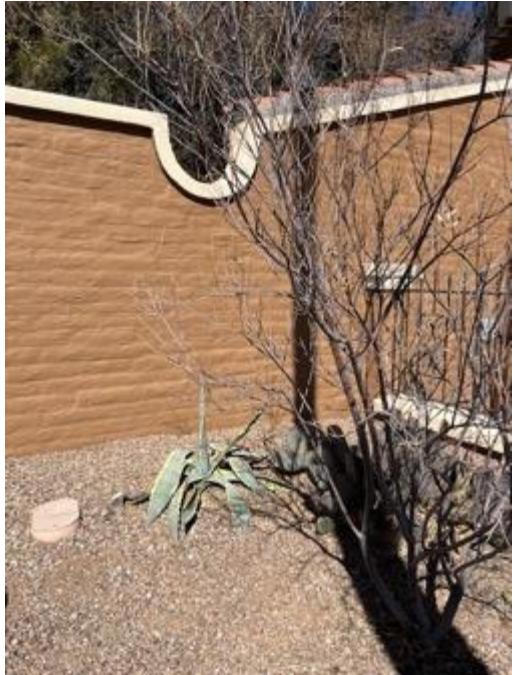

Replacements & Additions Area “B”
(Between Entry Gates and Gatehouse)

2/26/25
Ann Hirschhorn & Fern Goldstein

Area B North Side East of Gatehouse

TO WATCH

- Variegated agave to be watched; looking stressed
- Shrubs that have been cut back to be watched for re-growth (or replacement), including
 - Behind prickly pear/in front of agave in parking area;
 - Under large tree in corner, past end of parking area
- Perhaps check roots of palm (north side of tree)

Area B North Side East of Gatehouse

TO REPLACE OR ADD

- Oleander removal (plus possibly other losses?) has left open spaces that need to be addressed along the wall
- Dead shrub to the left of the Mexican Fence Post in front of dead tree w/ mistletoe
 - Replace w/ artichoke agave
- Corner of wall where oleander removed (near irrigation box)
 - Consider Desert Willow or other vertical plant
 - Add more Fairy Duster along wall (cassia an option?)
- Between hopseed bushes
 - Dead shrub needs replacement
 - Could use second tree near irrigation box
- Opportunity for ocotillo?
- Add agave next to purple hopseed bush?
- Empty wall left of saguaro grouping – consider prickly pear, fairy duster
- Need a yucca (focal point) or cactus to left of two palms before hop bush cluster

**Area B North Side
East of Gatehouse**

TO REPLACE OR ADD

- Under existing yucca there is a single agave; move out from underneath and add two more in this area to create a grouping around/near rocks

**Area B North Side
East of Gatehouse**

TO ADDRESS

- Consider pruning or tie back branches so saguaro has room

Area B South Side East of Gatehouse

TO REPLACE & ADDRESS

- Need to add hopseed bushes on south side of entry way just past gates to conceal dead tree stump (assuming the stump is not on our property) – or remove if ours
- Replace two dead hopseed bushes and add more to complete the hedge screen

ALSO

- Recommend adding color in area immediately past entry gate
 - Needs to handle shade
 - Cassia? Fairy Duster?

**Area B South Side
East of Gatehouse**

TO REPLACE

- Dead shrub behind agave

TO ADDRESS

- Remove nursery tags in a few places, e.g. hop bush, ocotillo

TO WATCH

- Lantana in front of desert willow

Area B South Side East of Gatehouse

TO ADD

- Area to left of desert willow is very bare, consider adding:
 - Add barrels
 - Chenille prickly pear
 - Quadracolor agave
- Area in front of oleander, almost at first gate
 - could use more aloe by the rocks
- Very end is also very bare, consider
 - Organ pipe by wall
 - More barrel, prickly pear

- When looking across Ina Road entrance from the South Side to the North side, you see dead trees and the garage of the house. Is it possible to plant something in the HOA area behind the mastic / wall to cover at least some of this? Might require moving existing planting
